

Heathrow Noise & Airspace Community Forum

26 November 2025

Concerns about expansion

- Frustration at lack of certainty for those with homes under threat.
- Minimal engagement to date on proposals with those most impacted.
- Impact of greater concentration of flight paths.
- Uncertainty around changes to flight paths and impact on overflowed communities.
- How will Government engage NACF members as part of ANPS review?
- Should NACF be submitting a collective view on what the noise assessment framework should look like?

Noise Impacts

- 4,750 homes potentially left uninhabitable -where will these people live?
- What plans for mitigation can possibly be adequate?
- What assessment on the health impacts from noise from the additional 756 aircraft a day will be undertaken?
- When will formal engagement begin?
- Will Heathrow offer be the same as in 2019?
- What metrics will be used to understand noise impacts?
- Will Heathrow/NACF endorse modelling on multiple flight path scenarios?
- If Arora scheme chosen - how will noise impacts be assessed and mitigated?
