

MANAGING NOISE FOR AN EXPANDED HEATHROW

Heathrow Community Noise Forum - 19 September 2018

Rick Norman, Head of Noise

Heathrow
Building for the future

RUNWAY OPERATIONS

- Building on the consultation feedback received earlier this year, in January 2019, along with airspace change, we will be consulting on and seeking views on our runway operations
- This will include how best we should manage our future operations such as aspects of night flight management and runway alternation
- The responses from the January consultation will then inform the consultation in June next year

STAKEHOLDER ENGAGEMENT WORKSHOPS

- Before the consultation in January 2019 we are planning to carry out stakeholder engagement workshops to help shape our plans
- These will be carried out across different stakeholder groups:
 - Community forums e.g. Heathrow Community Noise Forum, Local Focus Forum, Heathrow Community Engagement Board
 - Local authorities
 - General public
 - Aviation industry
- These workshops will be held in October (dates TBC)
- We would like the Forum to appoint 2 members to be the HCNF representatives at the Community forums workshop
